

# Inclined chess set

The designer Eva Starková, author of the famous Refraction chess set, created another chess masterpiece - the Inclined chess set.

All pieces have a quadratic base and slanted front side, this shape breathes life into the crystal which reflects in various ways and creates extraordinary views from all sides.

The figures are decorated with various hand carved cuts, made by master cutter Jiří Neužil. The black side is very clearly differentiated by matt tops.

This wonderful chess set will be produced in a limited series of 50 signed pieces.
